

US 89 Closed South of Page Due to Landslide

OPEN: US 89A, STATE ROUTE 98, US 160

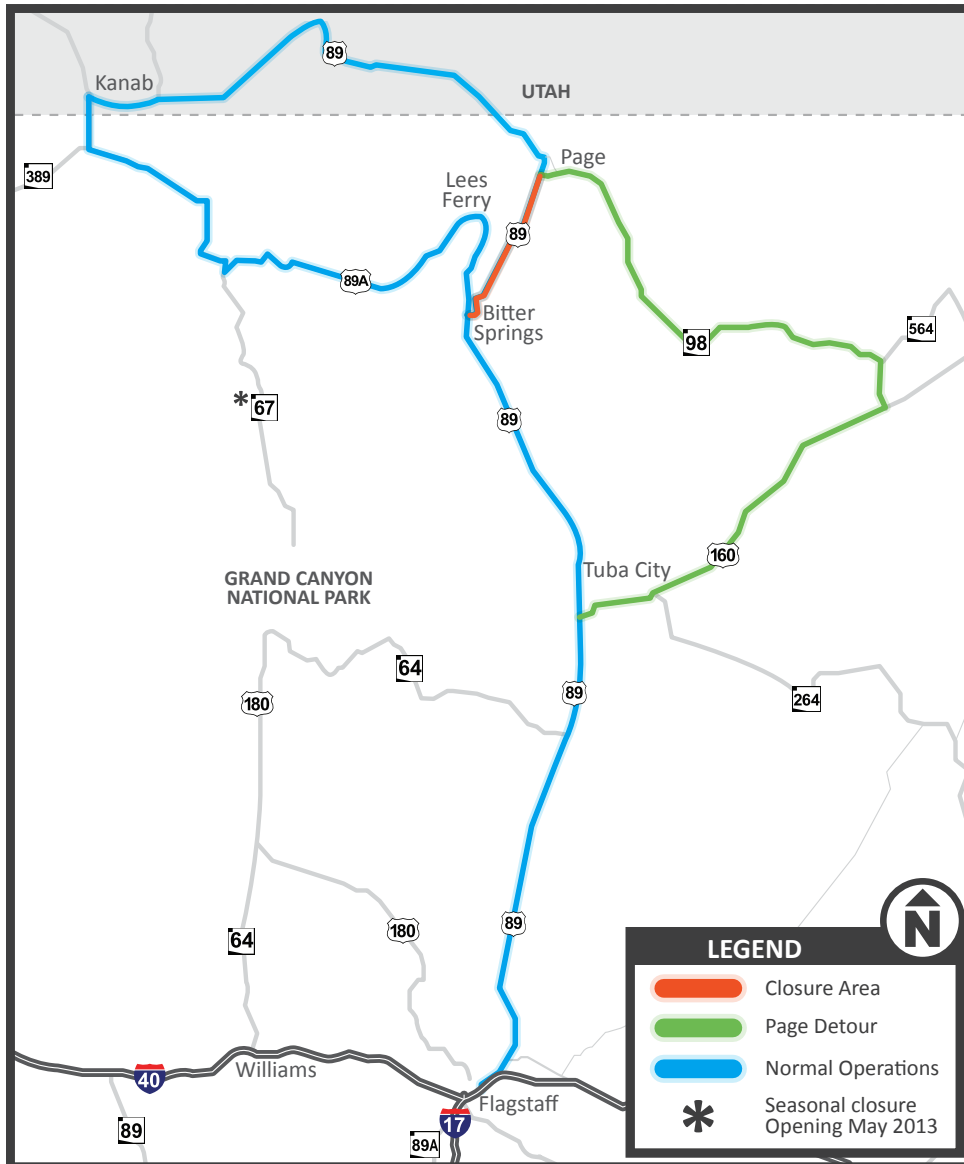

On Feb. 20, 2013, a landslide ripped through a section of US 89 along a mountain slope about 25 miles south of Page, buckling more than 150 feet of the roadway and tearing the pavement up in six-foot-high sections.

The significant roadway damage forced the Arizona Department of Transportation to immediately close a 23-mile-long stretch of the highway (at mileposts 523-546) between the US 89A junction near Bitter Springs to the State Route 98 junction near Page. There is no timetable for reopening the highway; however, ADOT is working to ensure the stability of the slope and restore this important travel route as soon as safely possible.

The closure affects only the designated section of US 89. All other roadways on the state highway system are operating under normal conditions.

US 89 DETOUR INFORMATION

US 89 is closed between the junction with US 89A and the SR 98 junction in Page. US 89A, US 160 and SR 98 are open for alternative travel routes.

ADOT inspects damaged US 89 immediately after landslide damage reported. Feb. 20, 2013
